**Thorburn's
Bulbs
1920**

J.M.Thorburn & Co.
53 BARCLAY STREET
THROUGH TO 54 PARK PLACE
New York City

Important Information

IN THIS, our Annual Catalogue of Bulbs, Seeds, etc., for Fall Planting, customers and friends of the house of THORBURN will find an assortment of choice products worthy of especial consideration.

Though the ruling of the Federal Horticultural Board (Quarantine No. 37) has prohibited the importing of many Bulbs, our 1920 line offers a wide variety—all of the highest quality. We are confident your selection from this line will leave nothing to be desired.

However, should you desire any varieties not shown, send us a list of your requirements, and we will gladly procure them for you, should the embargo on importations be removed.

Bulbs may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

OUR BULBS ARE ALL SELECTED FIRST-SIZE TOP ROOTS, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

NAME AND ADDRESS. We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.

ORDERS should be sent as soon as possible after receipt of this catalogue. The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted, the supply of Holland Bulbs being short this season.

Prices, as will be seen upon comparison with others, are as low as Highest Grade Bulbs can be sold at, and **DO NOT INCLUDE TRANSPORTATION.**

We indicate under each heading of the various Bulbs the mailing weight when packed, so that if wanted by parcel post, our customers can determine the amount required to be added for postage according to zone rate, as per table on third cover page.

The weights given are those taken from our stock last year, and may vary in some instances; should there be any difference in weight when orders are filled, the postage will be adjusted, and any amounts over-remitted will be returned.

Large packages can be sent by express, in most cases, cheaper than by mail.

J. M. Thorburn & Co. give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Please address all orders and remittances to

HYACINTHS

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

Outside Culture. In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow-manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly.

Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow into it.

Culture in Pots. For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with

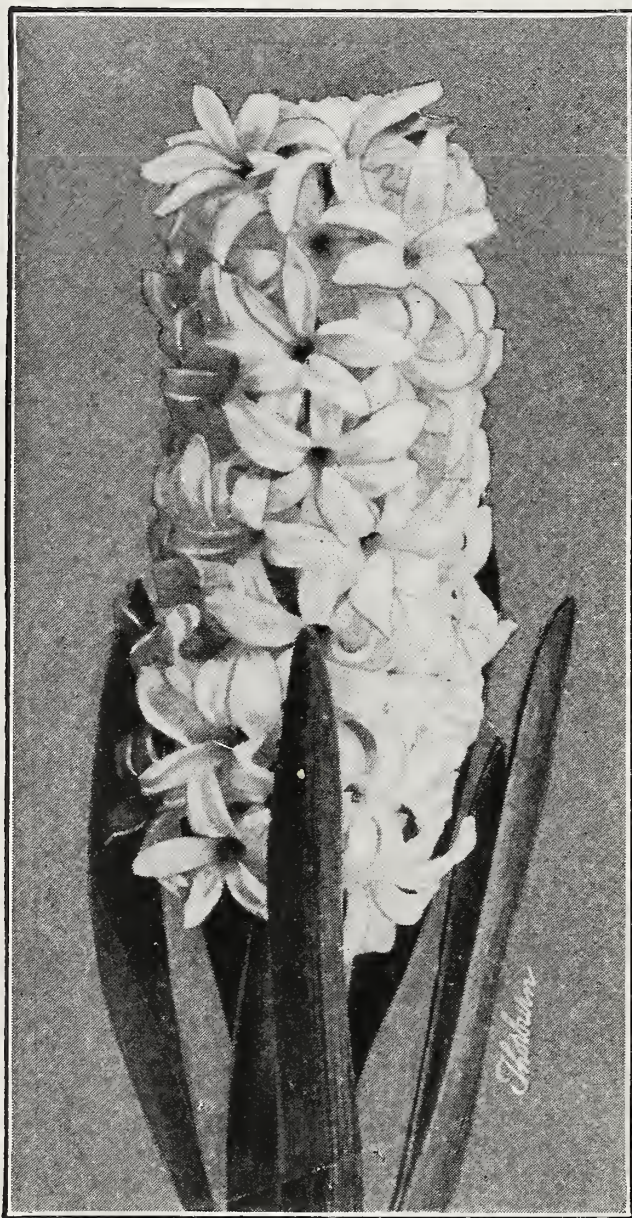

some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house where the warmth will soon bring them into flower. Where succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

Culture in Glasses. Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rainwater should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying whether bulbs are wanted for pot, glass, or garden culture.

We invite special attention to the assortment of Named Hyacinths of our selection offered on page 3, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips quoted in this catalogue are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

Single Hyacinth, L'Innocence

SELECT NAMED DUTCH HYACINTHS

N. B. Our Select Named Hyacinths are the cream of the Holland nurseries—and are **Extra-selected Top-Roots**, 19 cm. and upward—under their original names. For forcing in pots or for outdoor beds they far surpass the class of bulbs usually sold, being larger and better than the first- or second-size bulbs often sent out at lower prices.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties that do well for forcing in water are distinguished by two asterisks (**).

Price of all named Hyacinths, 30 cts. each, \$2.40 for 10, \$21 per 100

Not less than 5 of one kind sold at the 10 rate; 25 of one kind at the 100 rate. If to be sent by mail, add postage at zone rates—10 bulbs weigh 3 pounds. Single bulbs mailed free

Single Red and Rose

General DeWet. Very fine light rose; broad spike.

Garibaldi. Glowing crimson-red. Early.

Lady Derby. Bright rose-pink; very large spike; fine for pots.

La Victoire. Deep scarlet-red; fine spike; good exhibition variety.

Queen of the Pinks. Beautiful rosy pink; extra bells; long spike. New.

Roi des Belges. Deep red; compact spike.

Double Red and Rose

Bouquet Royal. Rose; dark center; large spike.

Chestnut Flower. Rose; large bells.

President Roosevelt. Deep rose; fine bulb; large compact spike.

Single Blush and Pure White

Arentine Arendsen. Early; pure white with fine open petals. Extra.

Grandeur a Merveille. Rosy white; large well-formed spike.

Grande Blanche. Blush-white; large bells.

L'Innocence. Pure white; large truss; best all-round white Hyacinth.

Double Blush and Pure White

Royal Bouquet. Pure white; large spike.

****Isabella.** Blush-white; splendid spike.

La Grandesse. Pure white; fine large bells.

Single Blue

Dr. Lieber. Early; lavender-blue, tinged violet; compact spike; extra-fine new variety.

Duke of Westminster. Deep purplish blue; large bells with white center. Extra.

Ivanhoe. Deep purple, light center; extra fine.

King of the Blues. Dark blue; extra-large spike.

Double Blue

****Bloksberg.** Light blue; large spike.

Garrick. Bright blue.

****General Kohler.** Bright blue; large spike.

Single Lilac and Mauve

Lord Balfour. Purple; large spike.

Mauve Queen. Purple; fine truss.

Single Yellow and Orange

City of Haarlem. Pure yellow; large truss; extra-fine exhibition variety.

King of the Yellows. Bright yellow; handsome compact spike.

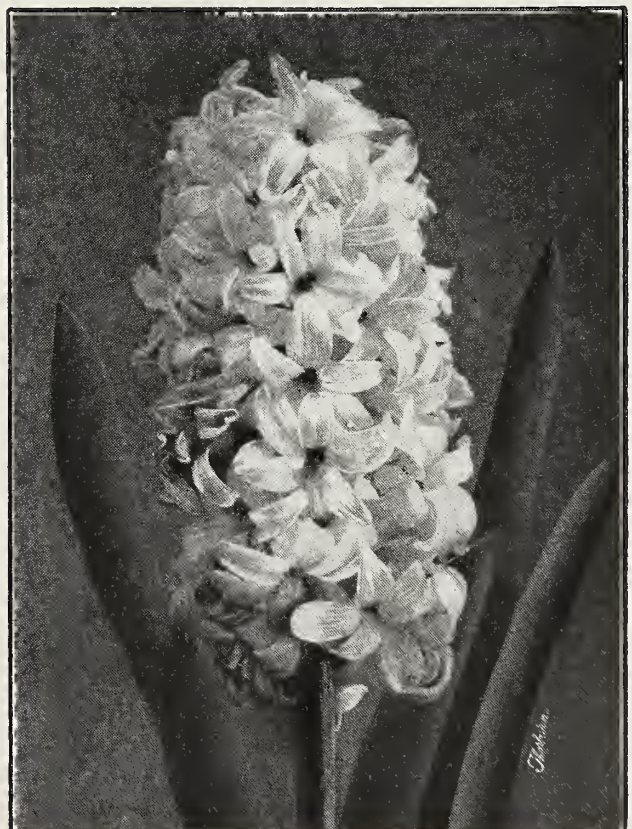

Yellow Hammer. Golden yellow; good spike; early.

Double Yellow and Orange

****Goethe.** Pale yellow; good spike.

Bouquet d'Orange. Reddish orange; good spike.

Our bulbs are of the right age, sound, plump and well matured. The size of the bloom is the ultimate measure of quality

Single Hyacinth, Grande Blanche

MIXED DUTCH HYACINTHS

IN SEPARATE COLORS. EXTRA QUALITY. LARGEST BULBS

Suitable either for forcing or bedding. If to be sent by mail, add postage at zone rates—10 bulbs weigh 2 pounds, 100 bulbs weigh 16 pounds

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. Also admirably adapted for forcing in the greenhouse for winter cut-flowers.

\$1.25 for 10, \$10 per 100. Not less than 50 of a color at 100 rate

- Single Dark Red.

Single Rose and Pink. All shades.

Single Red. All shades.
- Single Pure White.

Single Blush-White.

Single White. All shades.

Single Dark Blue.
- Single Light Blue.

Single Blue. All shades.

Single Yellow. All shades.

Single Mixed. All colors.

We do not offer Double Mixed Hyacinths for bedding as they do not succeed as well as the single varieties. We can, however, procure for any of our customers so desiring.

Double Mixed in separate colors or Mixed, all colors at same price as the Single Mixed.

FRENCH ROMAN HYACINTHS

Extensively used by florists for forcing for cut-flowers.

If to be sent by mail, add postage at zone rates—10 bulbs weigh 2 pounds

Pure White. 12 to 15 centimeters, 15 cts. each, \$1.25 for 10, \$10 per 100.

CROCUS

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful.

If to be sent by mail, add postage at zone rates—10 bulbs weigh 8 ounces; 100 bulbs weigh 3 pounds

HYBRID NAMED CROCUS

These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Remarkable for richness of color and immense size. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

Not less than 10 of a kind sold

TULIPS

For beauty of form and brilliancy of coloring, Tulips are unequaled. For bedding they are the most popular and effective of all hardy bulbous plants. In order to assist our customers in selecting varieties of Tulips for beds in borders, etc., we give herewith a list of the most popular varieties, in early and late sorts. The height of stem is indicated as "tall" and "medium." The varieties indicated in heavy-faced type are choice and are highly recommended. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

CULTURE. The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 to 6 inches between the bulbs is sufficient. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. **To obtain the best results it is desirable that they should not be planted in ground where Tulips were grown the previous year.** We

recommend early planting so that the bulbs may obtain a good root-growth before the frost sets in. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

Single Early Tulip, Pink Beauty

SINGLE EARLY TULIPS

Not less than 5 of a kind sold, unless otherwise specified; 50 of a kind at 100 rate.

If to be sent by mail, add postage at zone rate—10 bulbs weigh 2 pounds, 100 bulbs weigh 9 pounds.

A and B indicate seasons of flowering. A and B may be planted to flower about the same time in the open ground, B being a trifle later.

Grandis Narcissus

NARCISSI

Narcissi are ready for delivery in September

Narcissi are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty, and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes, or ponds, and in mixed flower—or shrubbery—borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

All largest size bulbs. If to be sent by mail, add postage at zone rates for weights indicated.

SINGLE NARCISSI or DAFFODILS

Large Crown, or Trumpet Narcissi

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

	BICOLOR	
	10	100
Empress. One of the largest and most beautiful; white perianth and rich golden yellow trumpet. An excellent forcer. Largest Mother Bulbs (10 bulbs weigh 3 lbs.).....	\$0 85	\$8 00
Grandis. White perianth, yellow trumpet; later than Empress. (10 bulbs weigh 2 lbs.).....	80	7 50
Princeps. Sulphur-yellow perianth and deep yellow trumpet; long, handsome flowers. Valuable for forcing or outdoor culture. A splendid variety. Largest Mother bulbs (10 bulbs weigh 2 lbs.).....	65	6 00
Victoria. Creamy white perianth, rich yellow fluted trumpet. Largest Mother Bulbs (10 bulbs weigh 2 lbs.).....	85	8 00

YELLOW

Emperor. Large, golden yellow trumpet, deep primrose perianth. One of the best Daffodils for medium and late forcing. It is very free-flowering, with large, solid flowers of great substance. Largest Mother Bulbs (10 bulbs weigh 3 lbs.)..	85	8 00
Golden Spur. Uniform deep golden yellow. Most popular of the single Narcissi, owing to its earliness and the substance and beauty of its flowers. Fine forcer. Largest Mother Bulbs (10 bulbs weigh 2 lbs.).....	85	8 00
Major (Trumpet Major). Pure yellow. The old variety. Earliest forcing. (10 bulbs weigh 1 lb.).....	70	6 50
Spurius (Single Van Sion). Pure yellow; large, expanded trumpet. Excellent for forcing. (10 bulbs weigh 3 lbs.).....	70	6 50

Short Trumpet Narcissi

BARRII

Narcissi belonging to this group are crosses between yellow Trumpets and Poeticus. The crown usually is not over one-third the length of the perianth. Excellent for naturalizing. (10 bulbs weigh 1 lb.)

Albatross. Perianth white, pale lemon cup, frilled and edged glowing orange-red; beautiful.....	10	100
	\$0 70	\$6 50

SHORT TRUMPET NARCISSI, BARRII, continued

Conspicuous. Broad yellow perianth, broad short cup, edged bright orange-scarlet; very free bloomer.....	10	100
	\$0 65	\$6 00
Lady Godiva. Perianth white, cup broad; yellow, edged bright orange-scarlet..	65	6 00
Sea Gull. Large, spreading white perianth, cup canary, edged apricot.....	70	6 50

INCOMPARABILIS

These are crosses between the Yellow Trumpet, and Poeticus but the crowns are larger than those of the Barrii group, sometimes being three-quarters of the length of a perianth segment. The color of the perianth is either yellow or white.

Autocrat. Deep yellow perianth and cup; very pretty. (10 bulbs weigh 1 lb.)..	10	100
	\$0 65	\$6 00
Simplex. Single; yellow; early. Fine for cutting, also for forcing. (10 bulbs weigh 2 lbs.).....	50	4 50
Sir Watkin. Perianth sulphur, crown yellow, tinged bright orange. This is still the king of the short-cupped Narcissi, and used more generally and in larger quantities than any other short-cupped variety. Valuable as a cut-flower. Mother Bulbs (10 bulbs weigh 3 lbs.).....	65	6 00
Stella superba. White perianth, yellow cup. Good forcer. (10 bulbs weigh 1 lb.)	80	7 50

LEEDSII

These are crosses between the White Trumpets and Poeticus. The crowns are as large as those of the Incomparabilis group. The perianths are always white; the crowns are mostly white or light yellow.

Leedsii Type. Silvery white, lemon cup. (10 bulbs weigh 1 lb.).....	10	100
	\$0 65	\$6 00
Minnie Hume (Queen of England). Large white perianth, cup passing from fine lemon to white. (10 bulbs weigh 1 lb.).....	60	5 50
Mrs. Langtry. Pure white perianth, large white cup, edged yellow. Splendid for cutting or naturalizing. (10 bulbs weigh 1 lb.).....	60	5 50

NARCISSUS POETICUS

Varieties belonging to this group always have a pure white perianth. The cups are very short, but wide-mouthed, and always more or less deeply rimmed with orange or scarlet.

King Edward. Broad, pure white perianth, orange-scarlet crown.....	10	100
	\$1 25	\$10 00
Ornatus. Perianth pure white, cup yellow, margined scarlet. Useful for cut-flowers; very early flowering. Mother Bulbs (10 bulbs weigh 1 lb.).....	60	5 50
Recurvus (The Old Pheasant's Eye). Pure white perianth, scarlet cup; late. (10 bulbs weigh 1 lb.)	60	5 50

POETAZ MULTIFLORUS

New Hybrids between Poeticus ornatus and Polyanthus Varieties

A new race of Narcissi, perfectly hardy; they are crosses between Polyanthus and Poeticus ornatus, flowering in clusters like Polyanthus but without their fragrance.

Aspasia. Perianth pure white, yellow eye; large flower. (10 bulbs weigh 2 lbs.).....	10	100
	\$0 80	\$7 50
Elvira. Pure white, yellow eye; large flower; 3 to 4 flowers on a stem; very free-flowering..	75	7 00

Double Narcissus, Van Sion (See page 10)

Paper-White Narcissi

PAPER-WHITE NARCISSI

Paper-White Grandiflora. Large trusses of pure white flowers. Splendid forcer. Extra-large bulbs (10 bulbs weigh 2 lbs.), 60 cts. for 10, \$5 per 100, \$40 per 1,000.

DOUBLE NARCISSI

Alba plena odorata. Pure 10 100
white; a splendid cut-flower;
sweet-scented. For outdoors.
(10 bulbs weigh 1 lb.).....
\$40 per 1,000..\$0 50 \$4 50

Orange Phoenix (Bacon and Eggs). Large; double; white with orange base. (10 bulbs weigh 2 lbs.)..... 75 7 00

Van Sion. The largest double yellow Trumpet variety. Extra fine for forcing; largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety. The largest Mother Bulbs (10 bulbs weigh 2 lbs.)..... 90 8 50

POLYANTHUS NARCISSI

The varieties belonging to this class produce small, fragrant flowers growing in clusters. They are invaluable for forcing and may be grown under glass or in pots. If planted in the open border they must be protected over winter by a covering of litter.

Grand Monarque. White with 10 100
yellow cup; very large flowers;
vigorous grower. (10 bulbs
weigh 2 lbs.).....\$0 65 \$6 00

Grand Soleil d'Or. Yellow,
with orange cup; very free-
blooming. (10 bulbs weigh
2 lbs.)..... 90 8 50

FREESIA

If to be sent by mail, add postage at zone rates—10 bulbs weigh 4 ounces; 100 bulbs weigh 2 pounds.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs we may say that they are quite small, but produce large blooms in comparison to their size.

Purity. Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time. Large size, 40 cts. for 10, \$3.50 per 100, \$30 per 1,000.

Freesia, Purity

LILIES

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the tallest sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs and most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

If to be sent by mail, add postage at zone rates for weight indicated

Lilium Harrisii and *L. candidum* ready in August; others not until November.

Japan Lilies are quoted as offered from Japan, and are subject to arrival, as we may be disappointed in not receiving them.

Lilium superbum, *L. speciosum album*, *L. speciosum rubrum* and *L. tigrinum*

LILIUM HARRISII (Bermuda Easter Lily) BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

Washingtonianum. A lovely native variety of very stately habit; large, trumpet-shaped flowers, pure white, tinged purple or lilac; very fragrant; 4 to 7 feet. (10 bulbs weigh 2 lbs.).....	50	4 00	

CHINESE SACRED LILY (The Water Fairy Flower) READY IN SEPTEMBER

A variety of the Polyanthus Narcissus imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. Mailing weight (10 bulbs weigh 4 lbs.). Price on application.

LILY-OF-THE-VALLEY (Convallaria majalis)

EXPECTED; DELIVERY DEPENDS ENTIRELY UPON ARRIVAL

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf, and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from six to twelve in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three to four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

Clumps. Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. Some moss, litter, fine dried peat, or sand should be placed in the soil around the roots when planted out. (Weight, 3 lbs. each.) 50 cts. each, \$4.50 for 10, \$40 per 100.

Pips for Forcing. Finest exhibition size, Lubeck type. Bundle of 25, \$2; per 100, \$7. In original cases of 250 \$17, 500 \$32, 1,000 \$60.

IRIS

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up ten to twelve flower-spikes 3 feet high, each bearing two to four enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

PEONIES

EXPECTED IN OCTOBER

The old-fashioned double Peonies are too well known to require description. Their popularity is due to their great merits, their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Peonies rank about first for lawn, flower-border, or shrubbery decoration. Peonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow-manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall, to bloom the following summer. They are all hardy. We offer only strong, flowering roots, with three to five eyes.

If to be sent by mail, add postage at zone rates—1 root weighs 1 pound; 10 roots weigh 9 pounds.

Herbaceous Chinese Peony

Calla, Richardia Elliottiana

RICHARDIA (*Calla*)
READY IN OCTOBER

Tall-growing, bulbous perennials of graceful habit and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow-manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting them in September.

If to be sent by mail, add postage at zone rates as per weight indicated

White Calla, or Lily-of-the-Nile (<i>Calla Æthiopica</i>). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Mammoth size bulbs. (10 bulbs weigh 4 lbs.)	Each	10
	\$0 60	\$5 00
Elliottiana. Yellow flower. Dark green leaves, spotted silvery white. 2- to 2½-inch bulbs. (10 bulbs weigh 2 lbs.)	60	5 00

SANGUINARIA CANADENSIS (*Bloodroot*)

A showy, hardy spring flower. White, often tinged with pink. Prefers a light sandy loam or peat soil, but will grow anywhere; useful for ornamenting the front of flower borders. 10 cts. each, 75 cts. for 10, \$5 per 100.

TRILLIUM

American Wood-Lily, or Indian Shamrock

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are native of North America, and are known by various common names in different localities. They have violently emetic roots.

If to be sent by mail, add postage at zone rates—10 bulbs weigh 1 pound, 100 bulbs weigh 7 pounds

Hardy Perennial and Other Flower Seeds

FOR AUTUMN
SOWING

MAILED FREE OF POSTAGE

Many varieties of flower seeds, Annuals as well as Biennials and Perennials, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring. For full descriptions see our General Seed Catalogue. Character and hardiness indicated by letters A, Annual; B, Biennial; P, Perennial; h, hardy; hh, half hardy; g, greenhouse; t, tender.

New Giant Early-Flowering Spencer Sweet Peas

This new race of Sweet Peas is expected eventually to take the place of all other early and late varieties, as they bloom from four to six weeks earlier than the late-blooming Spencers sown at the same time and continue blooming for four months. They are vigorous growers with immense waved flowers borne on long, strong stems in threes and fours, adaptable to our warm summers, and free-flowering. We strongly recommend a trial of these new creations. These varieties, if sown early in fall indoors, will bloom by Christmas and continue all winter. They may also be sown outdoors in the same way as other sorts for summer flowering.

Lavender-Pink	54710 25	
Melody. This is a deeper shade of pink than Songbird, on white ground. It might be described as rose-pink on white ground; very pleasing; mostly four well-waved blossoms to each stem; free-flowering.....	54544 25	
Morning Star. Deep orange-scarlet or flame-color in standard, with rich or- ange-pink wings. Keeps its color well and does not burn badly. Flowers are large and waved, borne in threes and fours abundantly. Under artificial light its coloring is exquisite....	54555 25	
Mrs. Sim. Apricot-pink.....	54730 25	
Red Orchid	54735 25	
Songbird. Soft blush-pink shade; large, fine flowers, borne on long stems in threes and fours. When in full growth it appears as though every stem has four blossoms; of fine quality..	54576 25	
Snowflake. The blossoms are very large and of the best waved form, resembling the noted White Spencer; a free bloomer, with good, long stems.....	54566 25	
Yarrowa. Rose-color on first opening, changing as it develops to a charm- ing combination of light pink standards and blush wings; of vigorous habit. The flowers are produced on long, stiff stems.....	54590 25	
Spring Maid. The color is light pink on a cream ground. A most lovely variety, with very large, waved flowers. For an early cream-pink, Spring Maid is unexcelled.....	54587 25	
Choice Mixed	54760 25

Thorburn's Superb Pansy

PANSY

(Viola Tricolor; Heartsease)

Our Strains Have Never Been
Excelled

For very early outdoor bedding the seed is sown from August to October, in a coldframe or in rich, moist garden beds, from which the plants can be transferred to a coldframe, setting them 2 to 3 inches apart each way before severe winter weather begins. In spring three-fourths of them can be lifted out for bedding and the rest left to bloom in the frame. For winter blooming in a frame set the plants about twice as far apart and thin out half of them in the spring. Cover the blooming plants with sashes, adding a covering of matting or straw in very cold weather. In mild weather remove the mats and tilt the sashes to admit light, heat, and fresh air. In outdoor beds, raised a few inches above the ground, with a mulch of dry leaves and some brush to hold them in place, Pansies will often winter nicely and bloom until midsummer, when a relay of young, vigorous plants should

be ready to replace them. If they come into bloom in the heat of summer, the flowers may be small at first but as the weather becomes cooler they will increase in size and beauty, and make a glorious show in the garden. Early fall sowings give the finest flowers in spring, and a bed of Pansies is one of the most beautiful sights a garden can show. *The higher-priced sorts produce the largest flowers and the most brilliant colors. This should be borne in mind when ordering.*

We do not sell less than one-fourth ounce of a kind by weight

	1/4oz.	Oz.	Pkt.

borders.....57540 25

“ **Mixed**.....57570 25

CACTUS. hhP. Mixed varieties..57900 25

CALCEOLARIA. The seeds are very small
and should be sown in the greenhouse on
the surface of shallow boxes filled with a
light, sandy soil which has been sifted.
Sow moderately thick in rows on the sur-
face and cover very lightly with sifted
sphagnum moss, cocoanut waste, or very
light soil. Press the soil firmly on the
seed. The watering should be done care-
fully—an atomizer or brush is best. To
retain the moisture the box may be cov-
ered with a pane of glass which must be
removed as soon as the plants appear.
The soil should be light and rich. Pkt.

hybrida. Large-flowered; self-colored.
2 ft.....57990 25

“ Large-flowered; tigered or
spotted. 2 ft.....58000 25

rugosa, Mixed.....58060 25

CALENDULA. Hardy annuals about 1 foot
high. They are excellent for cutting and
are produced in great profusion. Pkt.

ing orange and yellow.
One of the best.....
oz. 30c...58200 5

COREOPSIS (Perennial Calliopsis). One of
our finest hardy perennials; bloom prac-
tically all summer; fine for borders and
groups. Pkt.

lanceolata grandiflora. Large, golden
yellow flowers; fine for cutting.58410 10

CAMPANULA (Canterbury Bells).
For a fine effect in the border, plant them
in clumps of separate colors, and they
are beautiful when massed. The perennial
varieties, treated as perennials, will flower
most profusely by midsummer. The tall
and stately growing kinds will be found
of great value for the border, while the
dwarf sorts make charming rock and edg-
ing plants. All the varieties like a rich,
sandy soil with good drainage. Pkt.

carpatica. hP. Deep blue; for rock-
eries, beds, and edgings.

CANDYTUFT (Iberis) , Perennial. Sow outdoors in fall in any sunny place. Pkt.	
gibraltarica . Outer flowers pink, inner ones white.....	58980 15
sempervirens . White flowers remain fresh nearly a month. 1 ft....	58990 15

CARNATION (*Dianthus Caryophyllus*).
Should be sown and kept in coldframe
until spring. Young plants are perfectly
hardy outdoors, but when two or three
years old they are injured by winter cold,
so that sowings should be made every
year. *The more expensive sorts produce
the finest flowers. The prices we quote, al-
though seemingly high, are most reasonable
for strains such as we offer.*

MARGARET CARNATIONS are an extra
vigorous race, especially adapted for
outdoor culture. Pkt.

Double White . Large, perfect flowers. 1½ ft.....	59120 10
Double Yellow . A clear, soft shade. 1½ ft.....	59130 25
Double Mixed . 1½ to 2 ft.....	59140 10

Giant Margaret. Malmaison Strain.
Extra large and perfect, a rich
variety of colors; 80 per cent gen-
erally come double. Splendid for
cutting. 1 ft....oz. \$2.50.. 59145 25 |

PERPETUAL CARNATIONS. This race
has large, elegantly formed flowers, con-
tinually abloom, upon closely branched
symmetrical plants, often called, from
their neat habit, Tree Carnations. Pkt.

Lawn Grass Seed Mixtures for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in. The sowing should be done when the ground is moist or before expected rain; after sowing the ground should be rolled.

Prices of all Lawn Grasses include free delivery in the United States, by freight, express, or mail at our option

The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three to four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 80 to 100 pounds to the acre. One pound of our Lawn Grass will sow a plot of 400 or 500 square feet.

1/2 lb.....	\$0 30	10 lbs.....	\$4 00
